

## CAMERA OPERATION QUIZ

Student Name \_\_\_\_\_

Grade \_\_\_\_\_

1. Connect the battery or power cord to the camera.
2. Mount the camera on the tripod. This will get a steady shot and free up your hands.
3. Switch on the camcorder. Make sure to set it in camera mode and not VCR/playback mode.
4. Load and cue up tape. It's best to have some separation between shots to avoid recording over previous footage.
5. Manually set white balance. Try different presets first and see which one is closest to
6. Manually set exposure.
7. Manually set focus. Experiment focusing on close and far objects
8. Practice using the zoom control. Try and make it smooth.
9. Operate pan and tilt on tripod. Make sure to use the locks.
